Barking Dog Noise Complaint

Monday, November 9, 2026 · Reference CHASE-20261108T124210Z-R1

To: San Antonio Animal Care Services / 311

I am reporting repeated, sustained dog barking from neighboring properties, including: 125 Sample St, 200 Other Ave.

On Sunday, November 8, 2026, 2 separate episodes of sustained dog barking were recorded within 24 hours, totalling 8 minutes of barking.

#	Date	Start	End	Duration	Barking (min)	Est. barking bursts
1	Sun, Nov 8	6:42:10 AM	6:58:35 AM	16m 26s	3.2	198
2	Sun, Nov 8	10:15:02 PM	10:41:47 PM	26m 46s	5.2	322

An episode is at least 10 minutes of barking with no pause longer than 30 seconds (episodes less than 10 minutes apart count as one). This report is generated when 2 or more episodes occur within 24 hours. Every episode was recorded. The recordings are attached to or linked from the email that accompanies this report, and the following pages detail the times, the recordings and how they were made.

I would appreciate your help resolving this.

Sincerely,
Pat Example
123 Sample St, Example City, TX
(555) 010-0000

Barking Evidence Report 2 episodes · 8 min

Reference CHASE-20261108T124210Z-R1 · times in America/Chicago

Rule applied

An episode is at least 10 minutes of barking with no pause longer than 30 seconds (episodes less than 10 minutes apart count as one). This report is generated when 2 or more episodes occur within 24 hours.

City of San Antonio Code of Ordinances, Chapter 5 (Animals). A 2017 city draft defines an animal noise nuisance as "a minimum of two separate recorded noise events over a period of twenty-four (24) hours."

> The quoted ordinance wording is from a 2017 draft of Chapter 5 and is unverified against the current code. San Antonio sets no per-event duration; this report defines an episode as at least 10 minutes of barking with no gap longer than 30 seconds, following Los Angeles practice.

Episodes

#	Start	End	Duration	Barking (min)	Est. barking bursts	Longest pause	Mean level	Recording
1	Sun, Nov 8 6:42:10 AM	6:58:35 AM	16m 26s	3.2	198	4 s	-24.5 dBFS	complete
2	Sun, Nov 8 10:15:02 PM	10:41:47 PM	26m 46s	5.2	322	4 s	-24.5 dBFS	**missing 12 s at 10:18:02 PM**

"Barking bursts" are estimated runs of continuous barking, not a count of each individual bark; barking minutes is the measured quantity.

Episode 1 timeline · Sun, Nov 8, 6:42:10 AM to 6:58:35 AM

6:42 AM 6:50 AM 6:58 AM

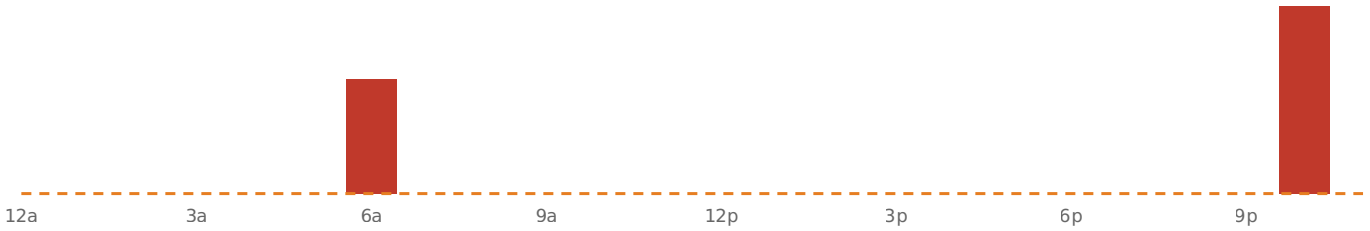
Red: barking detected. Black (outlined): no audio recorded.

Episode 2 timeline · Sun, Nov 8, 10:15:02 PM to 10:41:47 PM

10:15 PM 10:28 PM 10:41 PM

Red: barking detected. Black (outlined): no audio recorded.

Barking by hour · Sunday, November 8



Bars: barking bursts in each hour of this day. Dashed line: the average for that hour over the preceding days. Red bars are more than twice the usual level.

Recording details

Device	USB microphone (synthetic)
Location	fixed microphone on the reporting resident's property
Detector	yamnet.tflite (Google AudioSet classifier), dog-sound score ≥ 0.7
Clock	system clock (NTP-synced); times shown in America/Chicago
Audio	lossless FLAC originals retained; MP3 copies for convenience
